Brand story

Founded in 2010 by the Belgian royal designer Robin Delaere, Mumoon was inspired by natural design,a combination of subtle elements of life and the unlimited challenge of materials,thus transforming natural materials into stunning cutting-edge decorative lighting while extending the legend of lighting in natural materials.Human creativity and the coexistence of nature allow our products to gradually arouse people's aesthetic and practical interest,thanks to the long-term cooperation with DOS Design studio in Italy,KAISHI design studio in Spain and other international industrial designers.

Mumoon
& Designer

Robin Delaere

Belgium

Robin Delaere received his license in product development from the Antwerp Institute of Architecture and Design,Belgium, and pursued subsequent design training in California. Shortly after that he received a distinction from the King Boudewijn foundation for his work.

He has designed consumer products and furniture for internationally renowned companies and authored several patents for his award winning designs. Operating somewhat outside the Belgian design scene, he has managed to win numerous design awards in Germany, France, Japan and the US. His work has been published on numerous occasions.

Red Dot Award Winner

Robin Delaere

Belgium

“Great ideas have a funny way of designing for themselves. Only the good ones are worth putting on paper. From there on, a good deal of common sense and experience can take you a long way.”

Awards:

- Annual design review/ID magazine,design distinction,Cadstep (NY,USA'98)
- Spring selection Design Vlaanderen,Hang Ontable (Belgium,'00)
- Finalist ISPO,Brani belt (Germany,'01)
- Annual design review/ID magazine,best of category,Brani belt (NY,USA,'02)
- Sélection de l'Observateur du design 2002,Brani belt (France,'02)
- Red Dot design award,Brani belt (Germany,'03)
- Good Design award,Brani belt (Japan,'03)
- Design For Europe,Vitra design award (Belgium,'04)
- Annual design review/ID magazine,best of category (NY,USA,'05)

Philip Ding

China

As one of initiator of MUMOON Philip Ding embarked on lighting industry in year 1997. He has rich experiences in the design and production of modern lighting, as well as unique thinking and perspective especially for the structure processing of modern lighting. He is good at dexterously put the market trend, advanced materials and his unique ideas to use.

For these years, relying on his perseverance and firm belief, he has been insisting on innovative designs attempting to arose people's attention to Chinese creation and love of life through introducing original designs. By accident Philip Ding made acquaintances of the well-known industrial design master Robin Delaere and industrial designers of Dos Design, a design office in Italy and co-founded the international brand - MUMOON in Belgium, continuously creating uniquely original products.

Representative designs: GEOMETRY, ETEL, CLAS, GLOB

Philip Ding
China

'Don't design something useless. If you do, then make it more beautiful and practical!'

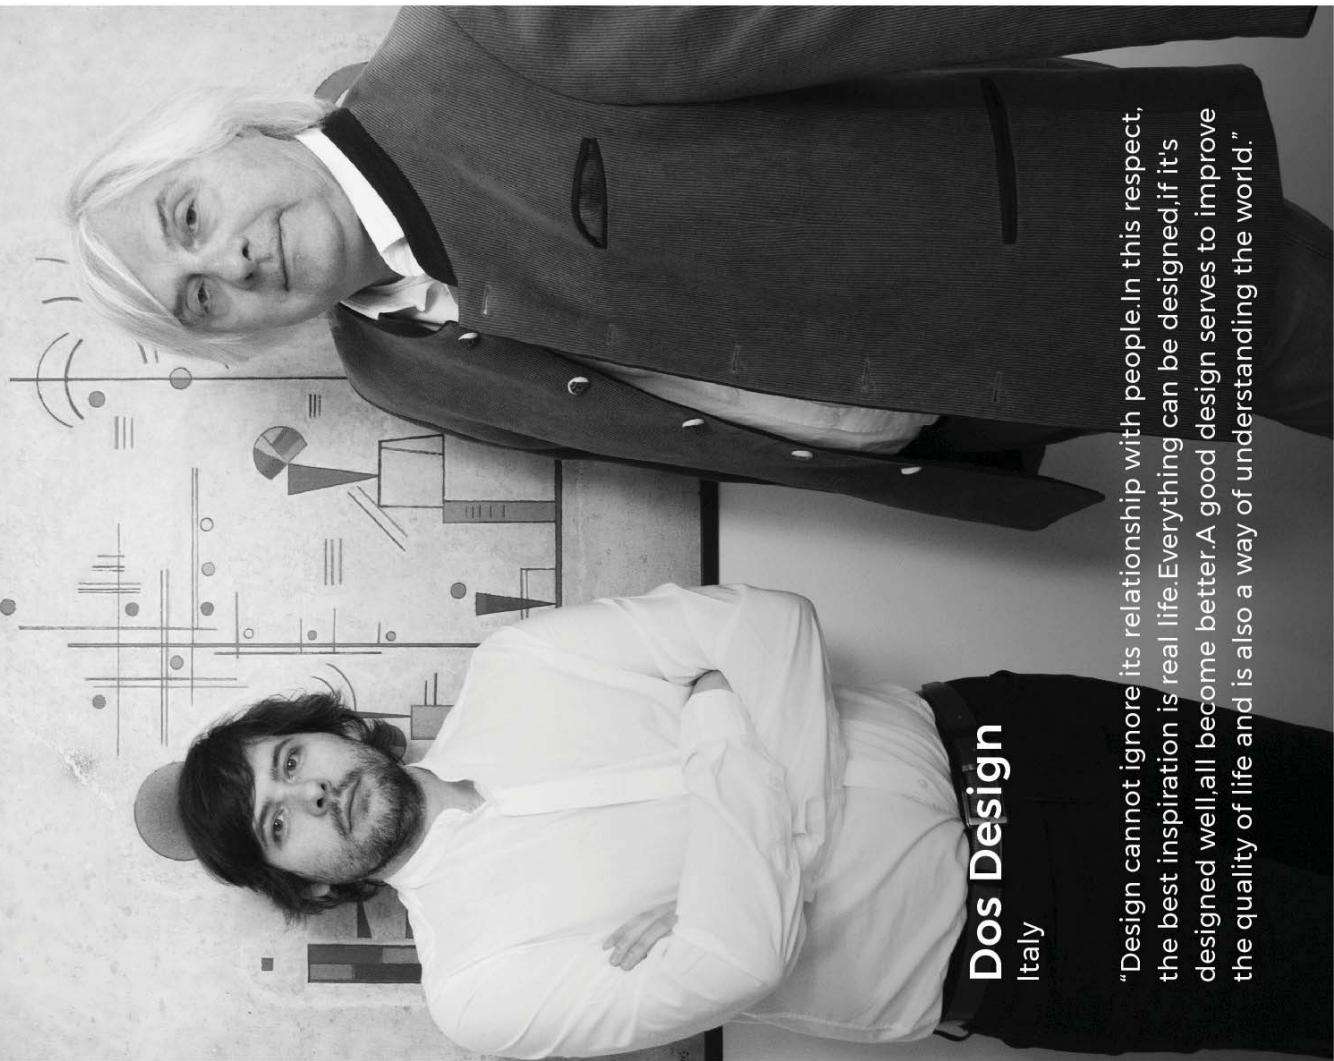

Dos Design

Italy

The studio is based in Venice (Treviso), Italy. It was established about 30 years. The main ambition of the studio and workshop has always been to create concepts and products with a distinct and timeless character. DOS design's mission is to elaborate system of products in line with the functioning and aesthetic requirements of our customers, as a meeting point between vision, technology and creativity/valuing past traditions as well as embracing future trends. It's a design concept that conjugates the market demand with the continual search of materials and systems reflecting and interpreting dreams, desires and demands that can enhance the quality of housing and living.

DOS design strives to engage its customers with intelligent, compelling and distinctively created design solutions.

Dos Design

Italy

"Design cannot ignore its relationship with people. In this respect, the best inspiration is real life. Everything can be designed, if it's designed well, all become better. A good design serves to improve the quality of life and is also a way of understanding the world."

Hugo Tejada

Spain

Hugo Tejada studied Industrial Design at the University Cardenal Herrera CEU, later specializing in automotive design at the UPV of Valencia. After graduating in 2007 began his career as part of the design department of important lighting company, in addition to collaborating with various national companies and design studios. In 2011 he founded his own design studio from which collaborates with various national and international companies at developing new products, providing his expertise and creative vision.

The studio's philosophy is innovation and product functionality, all projects are treated with the same passion and commitment, from the first sketch to the final product. The observation of the world around us is the main inspiration of the creative process; the analysis of the daily needs directly influence in the approach of new concepts, trying to facilitate the user's relationship with the objects around them.

The main objective is to provide service and advice to companies that consider design as an added value and that they need that their product to have a distinctive sign to help distinguish yourself from other, increasing the value of their brand and its competitiveness against of social times change that we live in today.

Hugo Tejada

Spain

“The design as an added value and that they need that their product to have a distinctive sign to help distinguish yourself from other, increasing the value of their brand and its competitiveness against of social times change that we live in today.”

Frank Zhang

China

Frank Zhang studied industrial design at the university. After graduating, he worked as a director of design in design affairs and haier. All his designs covered consumer electronics, medical equipment, industrial equipment, FMCG and so on. He received awards as IF and reddot several times with his team.

After then, he founded his own design company, which was engaged in products development. He has been wrestling for 10 years in the field of product design, still hope to enjoy the pleasure of design, finally putting all energy just focus on the design of lighting, furniture and other household products, to aspire bring good design for the masses in this area.

Frank Zhang
China

“A good design is full of logic and order, but the perfect design requires some surprises and coincidences.”

JIL

JIL

Designed by Robin Delaere

The beauty of balance.The tilted art.

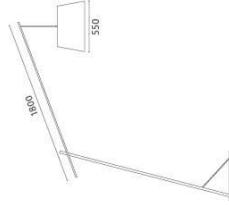

A simple but solid American red Oak body,an exquisite carbon steel pole,a thick and regular base,all under the accurate design of the designer's ingenious cohesion and collocation.This seemingly unbalanced lamp with a floating shade is a perfect example of the beauty of real and perfect balance achieved by the designer!American red oak,linen shade,cold carbon steel,these three different kinds of materials are used in the manufacture of this lamp.It is a work of ingenious interaction and integration, and available in three colors:black,white and gray.It's natural wood body reflects the simple,practical and beautiful design which is the essence of northern Europe.

ETEL

Designed by Philip Ding

ETEL

Designed by Philip Ding

Etel Lamp is inspired by and embodies the essence of industrial style,minimal and technical,reinterpreted with an elegant and youthful tone.Designed for table top:suspension and floor.its strong and decisive style is enhanced by the chosen materials:carbon steel,aluminium,glass and polyamide fibre.

Each material accentuates an aspect of the design:the synthesis of metals or the delicate colouring of the glass.Diverse souls living within the same design.this lamp complements diverse styles and environments.

JEB

Designed by Robin Delaere

JEB

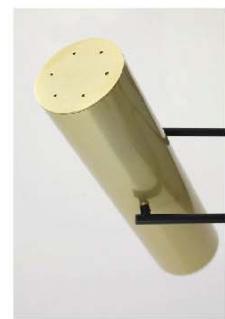

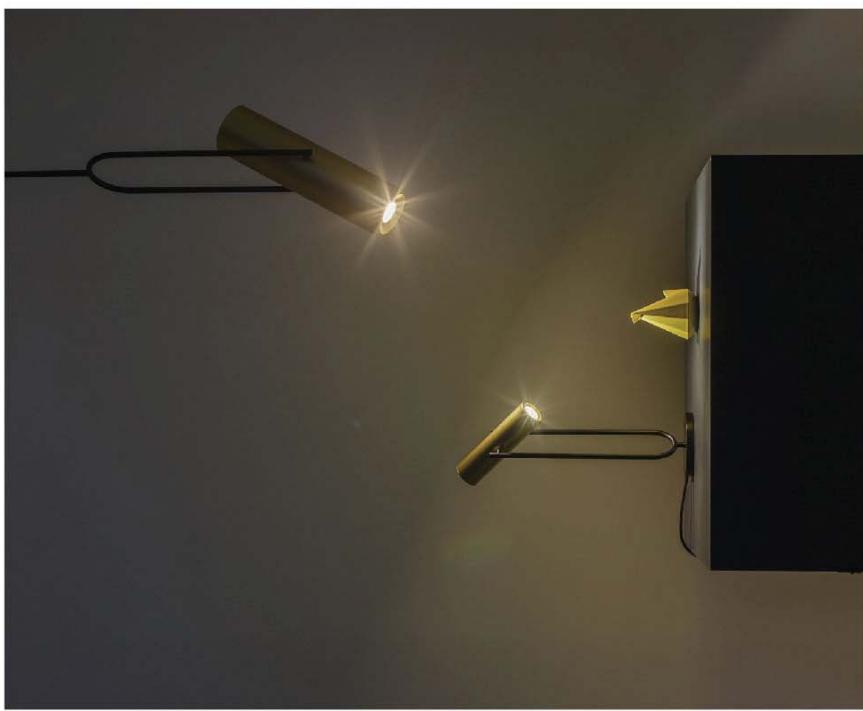

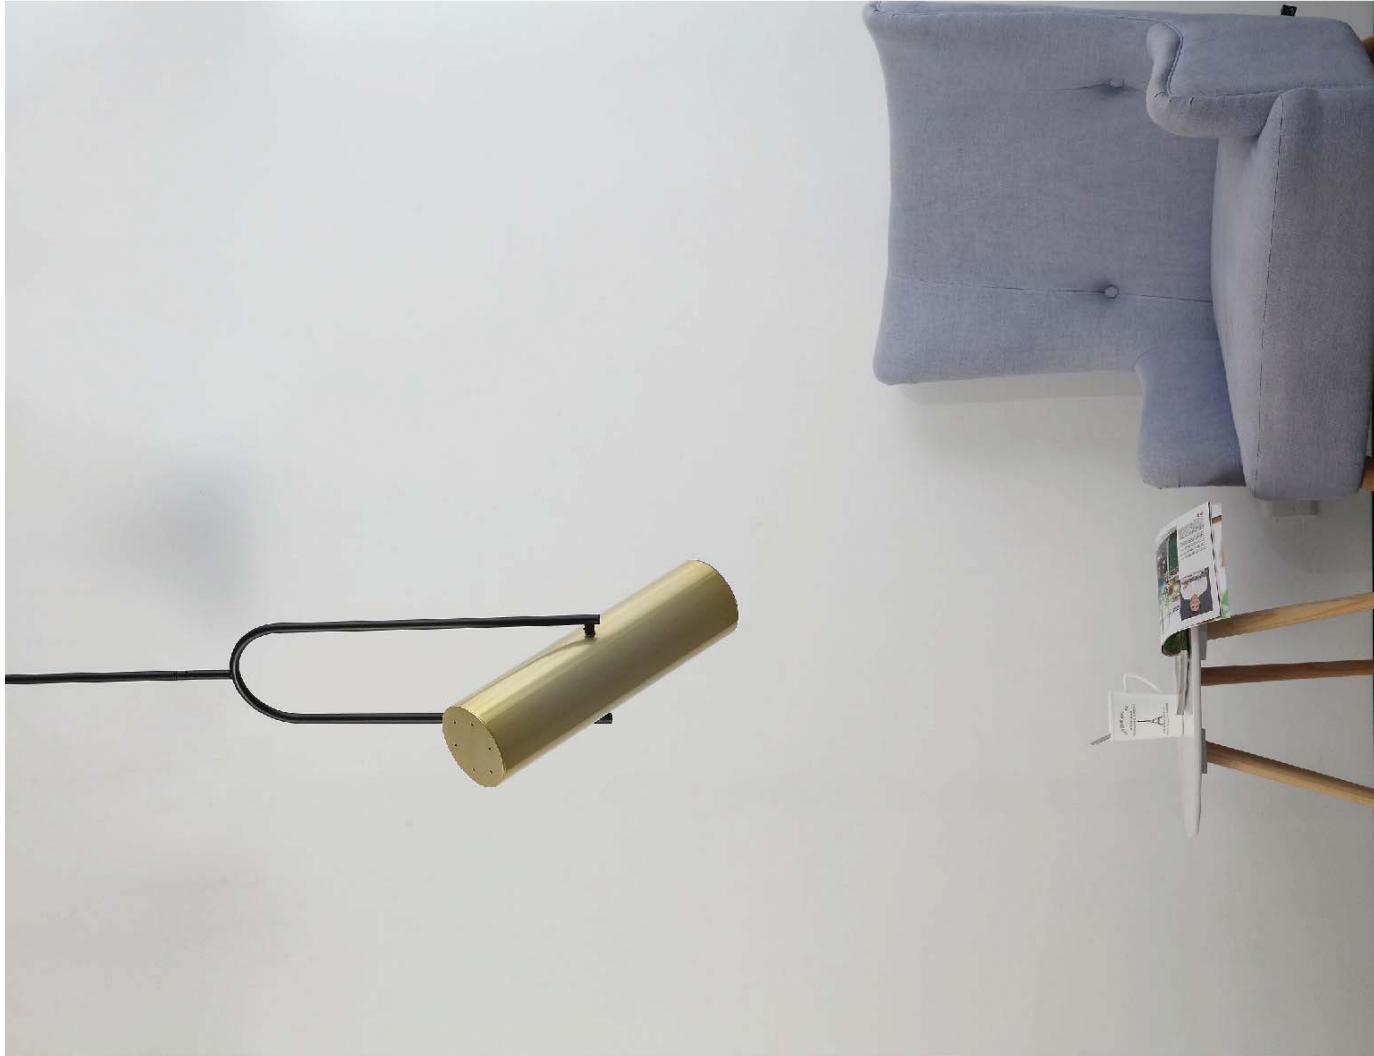

Shine a spotlight on good times.

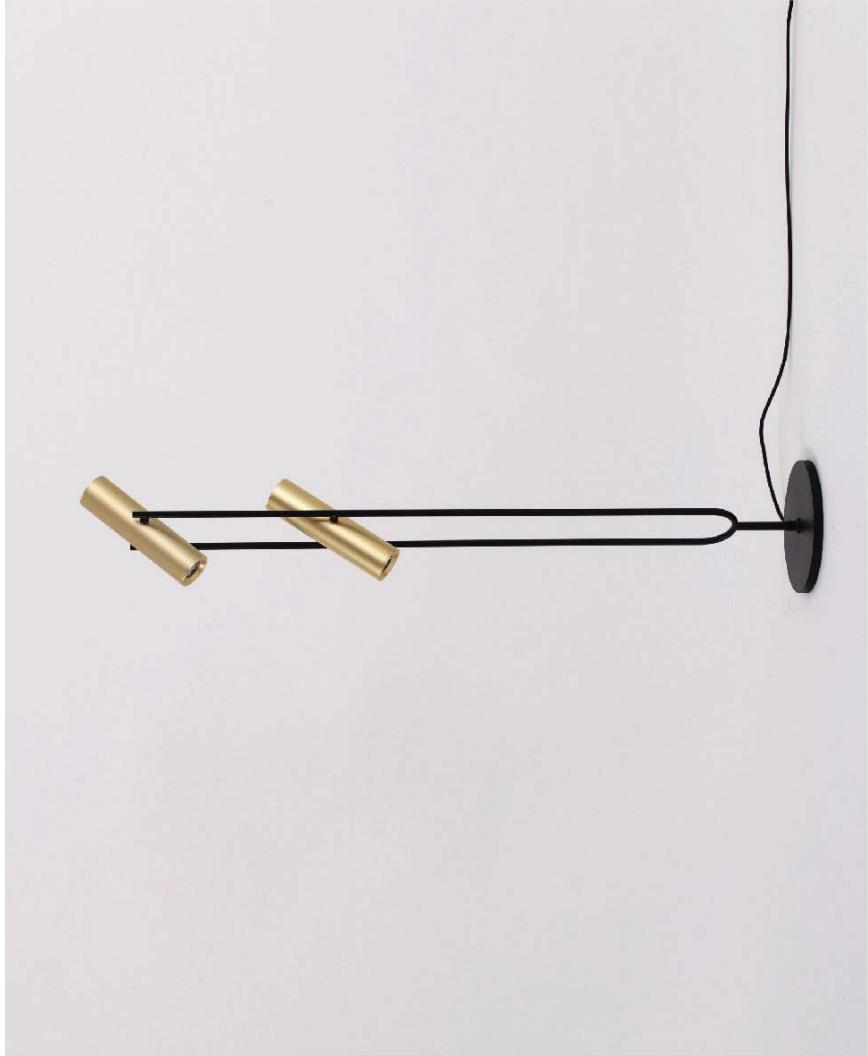

When the show is over, and the last spotlight is about to fade, a single person on the stage can cast a long shadow. This is the designer viewing the final act in Turandot. The spotlight above the stage is an ever-unfolding drama. The spotlight of our life illuminates the deepest part of the soul. Everyone's life has this light: the question is: how do we make it brighter?

How do we give our lives more meaning? The JEB is a design that touches your heart with a subdued, elegant simplicity. Let your own heart glow under this spotlight, genuine and free from the shackles of needless complexity. This is the true beauty of a well-designed JEB.

On the stage of life, shining a spotlight on good times.

SEEDS

SEEDS

Designed by DOS design-Giulio Signorotto

The essential nature of shape combined with the lightness of glass.

This new family of pendant lights is born of the inspiration of the shape of seeds.Three forms in perfect harmony that can be experienced individually or in well-balanced compositions.

The copper-coloured,metal diffuser is set within the lamp's transparent body;its light source is built-in.leaving room for the essential nature of the shapes.The lamp's glass body represents elegance and weightlessness:drops of light suspended in the atmosphere.

COWBELL

COWBELL

Designed by Hugo Tejada

"When I hear the tinkling sound of the wind through chimes, I just hope that life may be as clear and melodious."

The designer of the Bell Lamp jotted his sentence down while working on the draft. Whenever the winter months draw near,reindeer fasten auspicious bells around their necks and prepare to pass through forests and tundra.Through the firework-filled streets and alleys of Christmas Eve,bells also softly sway,sending good tidings to every passerby.

Incorporating a bell of peace and tranquility into a work has long been a dream of the designer.Brimming with a sense of purity, it conveys a radiant brilliance for the entire space with each ring.The Bell is a work with both a kind of spirituality and a humanized design,made to light up a rich and peaceful life.During the first shades of nightfall,the lovingly-crafted Bell can be found in a foyer,dining room,or bedroom,warming the hearts of all those it shines upon.
